

VetScreen™

Meat Detection Kits

Empower your Food Safety efforts

Discover the Difference

With Mylab Discovery Solutions
Molecular Testing Solutions

Optimized for India

Considering the Indian Population all our pathogen detection kits cover all prevalent strains, Genetic disease detection kits are also optimized with mutations most prevalent in India; which are usually ignored by international testing solutions which are based on mutation only occurring in the Caucasian population.

Quality Assurance

Testing of internal positive/endogenous controls to check for extraction efficacy & PCR inhibitors for maximum quality & reliability assurance. Inclusion of positive & negative controls for quality check, ensures high security, reagent integrity, & result from reliable positive standards provided for all quantitative detection kits

Single Step RT-PCR

All Mylab tests are hassle free single-step RT-PCR tests

All Inclusive

Our solutions are inclusive of all reagents & plasticwares required to perform sample to Result analysis.

Simple and Fast

Simple reaction setup with easy data interpretation of results, within same day of sample receipt

Mylab Molecular Solutions

Behind Every Solution,
There Is Proven Performance.

Mylab Support

We understand that your work requires specialized, reliable, high-quality solutions, that's when you can rely on our team of experts to help ensure the best workflow options for your specific goals.

With an Application team of experts, you will receive lifetime application support on our products at no additional cost. Our team members are certified NABL auditors on which you can rely for your lab design and protocol set up operations

Affordability

With our thorough understanding of the molecular market, we are committed to providing the widest selection of testing solutions, with the highest quality for every budget, making us one of the preferred solution providers; and all this as we understand the 'Need' and we act on the 'Solution'

Even with the vast portfolio of assays and tests, we are always open to discuss the cost per test and the possibility of Reagent Rental solutions as per 'Need basis'

Usage Flexibility

Run different test on the same platform at the same TIME, which means you can check various Cancer Mutations or different pathogens at the same time

One Instrument For All Tests

- Cancer marker detection
- Viral detection
- Bacterial identification
- GMO marker detection
- Meat detection
- Predictive genetics/nutrigenomics

Forensics

VetScreen™ For Meat Detection

Mylab Discovery Solutions has been pioneer in the development of first of its kind Simple RT-PCR based kit - VetScreen™ Meat Identification kit which enables the simple and reliable detection of different types of meat.

VetScreen™ Kits

Cow Species
Identification Kit

Cattle Sex
Determination Kit

Bird Species Sex
Determination Kit

Pork Species
Identification Kit

Multi Meat Species
Identification Kit

Peacock Species
Identification Kit

IBR Screening Kit

IBR Detection Kit

Mylab VetScreen™ Kit

Kit Name	Reaction Size 50	Reaction Size 100
	Kit Cat.no.	Kit Cat.no.
VetScreen- Cow Species Identification Kit	VCI50	VCI100
VetScreen- Cattle Sex Determination Kit	VCSD50	VCSD100
VetScreen- Bird Species Sex Determination Kit	VBSD50	VBSD100
VetScreen- Pork Species Identification Kit	VPI50	VPI100
VetScreen- Multi Meat Species Identification Kit	VMSI50	VMSI100
VetScreen- Peacock Species Identification Kit	VPSI50	VPSI100
VetScreen- IBR Detection Kit	PIBD50	PIBD100
VetScreen- IBR Screening Kit	PIBS50	PIBS100
